# LEADING THROUGH CHANGE

BY JIM MILLER

By the time you read this column, the Iowa Association of Electric Cooperatives (IAEC) will have held its 2025 Annual

Meeting in West Des Moines with the theme of “Leading through Change.” And that’s the perfect phrase to describe my first year serving as IAEC board president.

## Growing connections

I’ve been reflecting on what the trade association for Iowa’s locally owned and governed electric co-ops has accomplished in 2025, and we worked hard to engage with our member co-ops on new levels. For example, Leslie Kaufman, IAEC executive vice president and general manager, made it a priority to attend Iowa electric co-op board meetings and staff safety meetings across the state during her first year on the job. During these visits, she learned about our members’ priorities and challenges as our industry experiences rapid change.

## Coordinated advocacy, united voice

I’m proud of how the statewide association engaged with our member co-ops during the 2025 Iowa Legislative Session as we advocated to safeguard electric service territory protections for the rural families, farms, businesses and communities we serve. We’re seeing more co-op board directors and co-op staff engage with their local legislators and other community leaders on this issue, and we were successful in changing the direction of proposed legislation that would have diminished Iowa’s long-standing service territory law.

When session ended in May, the statewide policy and advocacy

team rolled up their sleeves and developed a framework tool. It includes member input to analyze and define our statewide position on policy issues and aid in prioritizing resources to accomplish advocacy objectives. This tool will help our statewide staff work proactively on behalf of Iowa’s electric cooperatives as we lead through change.

We have built incredible momentum in 2025 that will propel us to the start of the 2026 Legislative Session next month. We anticipate another active session of challenges to the proven cooperative business model of self-governance and member ownership. IAEC will continue to unify and leverage the voices of board directors, employees and other member-consumers of Iowa’s electric cooperatives to advocate for safe, affordable, reliable and sustainable

power. We embrace leadership from all levels of our membership as we work with key stakeholders on local, state and federal tiers.

## A focus on co-op members

Now is the time to lead through change, and we will have ample opportunities to do so in the electric utility industry. It all points back to our electric cooperative purpose and our collective mission: to power lives and empower communities. Because electric co-ops are owned by the members we serve, our focus is always on you.

It has been an honor and a privilege to serve as your statewide board president this year. I wish you and your family a blessed holiday season and a prosperous 2026.

*Jim Miller is the board president of the Iowa Association of Electric Cooperatives.*

## EDITOR'S CHOICE CONTEST

### WIN A SMART BIRD FEEDER

The 2K HD camera on this smart bird feeder captures the vibrant colors and behaviors of every bird at your feeder. Every detail is recorded with crystal-clear clarity. Receive instant notification whenever birds are detected. Note: Some advanced AI features require a subscription, and new users get a 30-day free trial.

If you don't subscribe, core functions like live viewing and sharing still work as usual. For more details, visit [www.ieclmagazine.com/editors-choice-contest](http://www.ieclmagazine.com/editors-choice-contest).

### Visit our website and win!

Enter this month's contest by visiting [www.ieclmagazine.com](http://www.ieclmagazine.com) no later than Dec. 31. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified.

The winner of Lodge cast iron skillet set from the October issue was **Les Elgin**, a **Guthrie County Rural Electric Cooperative** member-consumer.

ENTER ONLINE BY DEC. 31!

# WHOLESALE POWER COSTS ARE RISING — WHAT IT MEANS FOR OUR COOPERATIVE

BY MICHAEL GEERDES

At Grundy County REC, our mission has always been to provide our members with safe, reliable and affordable

electric service. As a member-owned cooperative, we operate not for profit, but for people. This allows us to spread risk over time, invest strategically and make decisions that benefit our members, not shareholders. That's a key reason why our system has delivered safe, reliable and affordable power since the first home was energized on our line back on March 24, 1938.

Take a moment and think about how many times you use electricity in a single day – from brewing your

morning coffee to charging your cell phone or flipping on a light switch, electricity powers nearly every part of our lives. Behind every flip of a switch is an intricate system that must constantly evolve to meet growing demand, strengthen reliability and keep pace with new technologies.

Today, the average Iowa household served by electric cooperatives spends about \$5.25 per day for electricity; that's cheaper than buying a sandwich or specialty coffee drink! While the cost of most goods and services has increased twentyfold, or more, over the past 85 years, the average cost per kilowatt-hour has only doubled since the 1930s.

## Wholesale power costs rising

Unfortunately, like many electric cooperatives across the state, and even the country, we're facing significant wholesale power cost increases. Effective Jan. 1, 2026, Basin Electric Power Cooperative (Basin Electric), Grundy County REC's wholesale power provider, has announced a 10% wholesale cost increase to its member cooperatives, with future rate increases expected. This announcement directly impacts Grundy County REC and our membership.

## What the increase means for our co-op and members

On the bill you receive in February 2026 (January's usage), members will see the return of a Power Cost Adjustment (PCA) under the "Current Activity" section on the back of the bill.

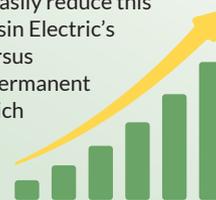

### What is a PCA?

When implemented, a PCA is either a credit or a charge on your electric bill each month. This makes sure consumers aren't overcharged or undercharged for electricity!

In this situation, the PCA reflects the increased costs incurred by Guthrie County REC for power generation as a result of Basin Electric's rate increase.

### PCA vs Rate Increase

By reinstating the PCA, we have the flexibility to easily reduce this charge should Basin Electric's rates stabilize versus implementing a permanent rate increase, which would be more difficult to reduce/lower.

District 2: Norbert Boyle  
District 3: Nick Strohhenn  
District 4: Larry Rohach  
District 5: Matt Kopriva  
District 6: Roger Brown  
District 7: Jason Paper

This institution is an equal opportunity provider and employer.

### What does this mean in dollars and cents?

Average residential co-op members use around 1,200 kwh of power per month, averaging an electric bill of around \$203.04.

With the reinstated PCA, the same bill would be about \$213.60, which equates to an increase of \$10.56 a month.

The PCA reflects the increased costs incurred by Grundy County REC for power generation as a result of Basin Electric's rate increase. By reinstating the PCA, we have the flexibility to easily reduce this charge should Basin Electric's rates stabilize versus implementing a formal rate increase.

### Key factors behind the increase

The increase in wholesale power costs can be attributed to several key factors. First, growth in traditional electric load (use) has required Basin Electric to invest in new generation and transmission projects to meet rising demand. Additionally, commodity price variability has led to fluctuations in fuel costs and affected sales revenue across Basin Electric's subsidiaries.

Finally, an increase in planning reserve margins mandated by Southwest Power Pool will require Basin Electric to maintain higher capacity reserves, resulting in greater capital expenditures, operating costs and purchased power. These combined factors contribute to higher overall wholesale power costs but also help ensure long-term system reliability.

While these increases are never welcome, they are part of a broader nationwide shift in how electricity is produced, regulated and consumed. Many of these forces are beyond the control of local utilities, but all of them influence what we pay for power – and, in turn, what appears on your bill.

### Adapting without a formal rate increase

Once again, I'd like to emphasize that this is NOT a formal rate increase implemented by the cooperative; it is a pass through. Grundy County REC will be using this PCA to cover the increase to the power bill we receive and pay, which made up nearly 65% of our annual expenses in 2024.

Even with these adjustments, electricity remains one of the best values in your household budget. It fuels comfort, connection and convenience, and it does so with a Grundy County REC reliability rating of 99.9734%.

## HOW EACH DOLLAR WAS SPENT IN 2024

Cost of Power 64.9%

Administration / General 8.6%

Operations / Maintenance 8.4%

Depreciation 7.7%

Interest on LT Debt 4.2%

Consumer Accounts 3.1%

Operating Margins 3.1%

## Cost Increases

The past five years have been a period of exploding costs for the electric utility industry and for broadband providers, pushed by soaring demand, supply chain challenges, raw materials shortages, increased labor costs and tariffs. The impact has been rapid increases in the cost of producing power, longer and more unpredictable project timelines and the need for more financing, all of which have driven electric rates up for residences, businesses and other end-users. Here's a look at what's contributing to the trend. **Percent increase since 2020:**

### Infrastructure Costs

Utility poles (wood, steel, composite)	+25-40%
Crossarms & braces (steel/wood)	+20-35%
Conductor wire (aluminum/copper)	+30-50%
Transformers	+70-100%
Grain-oriented electrical steel	+80-100%
Oil/dielectric fluids	+25-40%
Copper wiring	+50%
Concrete	+25-35%
Smart meters	+20-35%
Pad-mounted switchgear	+25-40%
Circuit breakers/reclosers	+20-35%

### Generation Costs

Diesel gensets	+30-40%
Gas turbines	+20-30%
Solar PV systems	+25-35%
Wind turbines	+25-35%
Hydropower components	+20-30%
Battery storage	+25-40%
SCADA/EMS systems	+20-30%
Inverters	+20-30%
Relays & switch gear	+25-40%
Natural gas	+20-30%
Coal	+30-50%
Diesel/fuel oil	+40-70%

### Build-Out Costs

Utility construction labor	+20-40%
Freight/logistics	+30-50%

### Fleet Costs

Light trucks	+25-40%
Bucket trucks, digger derricks	+30-50%
Fuel costs (especially diesel)	+40-50%
Maintenance	+15-25%
Insurance premiums	+20%

Our mission has always been simple and straightforward – to provide safe, reliable and affordable electric service to the members we serve. That promise hasn't changed, even as the challenges we face grow more complex. We remain dedicated to open communication, thoughtful and long-term planning, and operational excellence. Because to Grundy County REC, electricity is more than keeping your lights on, it's about powering growth, opportunity and a better quality of life for our members today, tomorrow and for generations to come.

Please don't hesitate to contact us if you have questions. Call us at 319-824-5251 or stop into the office.

*Michael Geerdes is the general manager of Grundy County REC.*

# YOUR GUIDE TO SMARTER ELECTRONICS

BY SCOTT FLOOD

Wouldn't it be great to wake up on a sunny morning, say "Good morning, house!," and stand back as the right light fixtures flash on, the coffee maker starts, the outdoor security lighting switches off and the toaster oven starts preheating for your frozen toaster pastry? That may sound like something from science fiction, but today's smart home electronics make it possible.

Smart devices use digital technology and Wi-Fi to take your home to a new level of convenience and comfort. They can also help you

make better use of your electricity so you can reduce waste and lower your energy bills.

Even if you've already put the many advantages of smart electronics to work for your home and family, you might be surprised by some of the newer devices with the potential to change your daily life.

### Smart thermostats

Heating and cooling use more energy than anything else in your home. Replacing your home's standard thermostat with a smart model can lower your monthly electric

bills while keeping you even more comfortable. Smart thermostats learn your daily habits and take over for you. You won't have to lower your thermostat every evening, because it will happen automatically. Because smart thermostats know exactly when you need electricity and when you don't, they waste a lot less.

### Smart appliances

The second-biggest share of your home's electricity powers appliances, from your refrigerator to your water heater. Smart appliances use Wi-Fi and high-tech sensors to operate

more efficiently. A smart washer can sense the size of your load and adjust the water and cycle times accordingly. Smart refrigerators can warn you when the kids leave the door open. And smart water heaters don't waste energy by heating water while you're asleep.

### Smart plugs and power strips

An easy and affordable way to explore smart technology is with smart plugs, which plug into your wall outlets. You can then plug lighting, appliances and other devices directly into them. You'll be able to control all those devices through a single app, so you can tell the coffeemaker when to start brewing, turn your exterior accent lighting off at dawn or have your favorite music already streaming as you walk in the door.

Smart power strips look like their ordinary cousins but use smart plugs. They're particularly helpful at eliminating waste caused by

what's known as "phantom load" – like leaving your phone charger plugged in when it's not charging.

### Smart shades

You wish your family room didn't face south, because it's always warm during the day. Smart shades and blinds can help. You can set them to automatically open or close depending on the time of day (and year) or based on your home's indoor temperature. They can help your air conditioner keep you cooler for less.

### Smart assistants

When you combine the capabilities of individual smart home electronics with voice assistants like Amazon Alexa or whole-home smart energy management systems, they become even more powerful. You can teach voice assistants to carry out multiple tasks that make up your daily routines, like the "good morning, house" message. Energy management systems simplify control

of all aspects of your home's energy use, and some offer specific tips to help you save even more.

### Be smart with your smart devices

While all those smart devices may be able to make your home more energy efficient and your life more comfortable, they're not perfect. Most require an internet connection, so if your service is down, your smart devices won't work, either.

Smart devices typically don't receive frequent system updates like your smartphone or laptop, so be aware of potential security issues. Before you choose a smart home device, make sure it's completely secure and compatible with what you have. Then prepare to be amazed by what smart home electronics will do for you!

*Scott Flood writes on a variety of energy-related topics for the National Rural Electric Cooperative Association.*

When you combine the capabilities of individual smart home electronics with voice assistants like Amazon Alexa or whole-home smart energy management systems, they become even more powerful.

Replacing your home's standard thermostat with a smart model can lower your monthly electric bills while keeping you even more comfortable.

# Holiday

## APPETIZERS

### CRANBERRY FETA ROLL-UPS

- $\frac{3}{4}$  cup dried sweetened cranberries
- 1 8-ounce package cream cheese, softened
- $\frac{3}{4}$  cup feta, crumbled (not reduced fat)
- $\frac{1}{4}$  cup green onion, diced
- 2 large tortillas, spinach or wheat flavor

Combine all ingredients except for tortillas. Lay tortillas out flat. Divide ingredients between the two tortillas and spread all the way to the edge. Roll tortillas up tightly, wrap in plastic and refrigerate for at least 1 hour. Trim ends of roll slightly, then cut each roll into 12 slices. These can be made one day ahead of time and sliced before serving. *Yields 24 slices*

Mary Ellen Metzger • Rockwell City  
Calhoun County Electric Cooperative Association

### MEATLOAF APPETIZERS

- 2 slices bread
- 2 pounds hamburger
- 1 pound sausage
- 2 eggs, beaten
- 2 tablespoons onion, chopped
- $\frac{1}{2}$  cup milk, approximately
- bacon
- barbecue sauce, optional

Break bread into small pieces. Mix bread pieces in a dish with hamburger, sausage, eggs and onion. Add milk and use fork to moisten hamburger mixture, add more milk as needed. Shape mixture into balls, wrap in bacon and seal ends of bacon with toothpicks. Bake at 350 degrees F for 1 hour, then add barbecue sauce to half or all, if desired. Return to oven for 15 minutes, or until hot.

Susan Ausborn • Ventura  
Prairie Energy Cooperative

### CHICKEN NUT ROLL

- 1 12.5-ounce can chicken
- 1 8-ounce package cream cheese, softened
- 3 tablespoons green onion, diced
- 1 teaspoon garlic powder
- 1 tablespoon Hidden Valley Ranch dry seasoning
- 1 tablespoon lemon juice
- $\frac{3}{4}$  cup walnuts, chopped, divided
- 2 stalks celery, chopped
- 2 tablespoons pimentos, well drained, optional
- crackers

Mix all ingredients, except crackers, using half of the walnuts. Form mixture into a log, star or Christmas tree shape. Sprinkle remaining walnuts over top of mixture. Refrigerate for 4 hours, or overnight. Serve with crackers. *Serves 6-8*

Nancy Anderson • Ankeny  
Prairie Energy Cooperative

### HANKY PANKY'S

- 1 pound ground beef
- 1 pound spicy pork sausage
- 1 pound Velveeta cheese
- 1 teaspoon Worcestershire sauce
- 1 teaspoon oregano
- $\frac{1}{2}$  teaspoon garlic salt
- $\frac{1}{2}$  teaspoon salt
- $\frac{1}{2}$  teaspoon pepper
- 2 packages party rye bread

Brown meat and drain. Add cheese, stir until melted, then add seasonings. Spread on rye bread. Bake at 350 degrees F until brown, approximately 10-15 minutes. *Serves 10-15*

Michael Treiber • Battle Creek  
North West Rural Electric Cooperative

## GINGERBREAD CHEESECAKE DIP

- 1 8-ounce package cream cheese, softened
- ¾ cup dark brown sugar, packed
- 2 tablespoons whole milk
- ¾ teaspoon ground cinnamon
- ½ teaspoon pure vanilla extract
- ¼ teaspoon ground ginger
- ⅛ teaspoon ground nutmeg
- ⅛ teaspoon salt
- 1½ cups whipped cream sprinkles, optional
- gingerbread cookies

In a large bowl, beat cream cheese until smooth. Add brown sugar, milk, cinnamon, vanilla, ginger, nutmeg and salt. Beat until smooth and combined. Add whipped cream and gently fold to combine. Transfer dip to a serving bowl and top with sprinkles, if desired. Serve with gingerbread cookies.

Marilyn O'Brien • Geneva  
Franklin Rural Electric Cooperative

## HAM-WRAPPED OLIVE SHRIMP

- ¼ cup olive oil
- 1½ teaspoons lemon zest
- 3 tablespoons fresh lemon juice
- ¾ teaspoon dried crushed red pepper
- ¼ teaspoon salt
- 30 large raw shrimp, peeled (about 1 pound)
- 10 deli ham slices, thinly sliced
- 30 pimento-stuffed Spanish olives

In a large bowl, whisk together the first five ingredients. Add shrimp and toss to coat. Cover and chill for 30 minutes. Preheat broiler with oven rack 5½ inches from heat. Cut each ham slice into three lengthwise strips. Wrap each strip around one shrimp and one olive, secure with a wooden toothpick. Place wrapped shrimp on a large, lightly greased baking sheet. Repeat process with remaining ham, shrimp and olives. Broil 3 minutes on each side or until each shrimp turns pink. Arrange appetizers on a serving platter and serve hot. These can be made ahead and refrigerated, then broiled just before serving. *Yields 30 appetizers*

Kary Blunk • Russell  
Chariton Valley Electric Cooperative, Inc.

## SAUSAGE WONTONS

- 12 wonton wrappers
- 1 pound ground sausage, crumbled
- 1 teaspoon seasoned salt
- 1½ cups cheddar cheese, shredded
- 1½ cups Monterey jack cheese, shredded
- 1 cup buttermilk ranch dressing
- ¼ cup green pepper, chopped
- ¼ cup red pepper, chopped

Lightly grease a 12-cup muffin tin. Press one wonton wrapper in each muffin cup. Bake at 350 degrees F for 5 minutes, until lightly browned. Remove and let cool on cookie sheet. In a skillet over medium heat, brown ground sausage and seasoned salt. Drain grease from sausage. In a bowl, combine sausage with cheddar cheese, Monterey jack cheese, ranch dressing and peppers. Mix with spatula until combined. Fill each cooked wonton with mixture and place in muffin pan. Bake at 350 degrees F for 5-6 minutes. *Serves 12*

Julie Allison • Marshalltown  
Consumers Energy

Visit [www.ieclmagazine.com](http://www.ieclmagazine.com) and search our online archive of hundreds of recipes in various categories.

## SAUSAGE CHEESE BALLS

- 2 packages Jimmy Dean Sausage, uncooked
- 1 16-ounce package shredded sharp cheddar cheese
- 1½ cups all-purpose baking biscuit mix
- ½ cup celery, finely chopped
- ½ cup onion, finely chopped
- ½ teaspoon garlic powder
- barbecue sauce, optional

Mix first six ingredients together and form into 1-inch balls. Bake on a cookie sheet at 375 degrees F for 15 minutes, or until golden brown. They can be served with barbecue sauce in a slow cooker on low. *Yields 6 dozen, approximately*

Karen Caldwell • Albia  
Chariton Valley Electric Cooperative, Inc.

## SIMPLE BACON CHEESE BALL

- 2 8-ounce packages cream cheese, softened
- ⅓ cup sour cream
- 8 ounces cheddar cheese, shredded
- ½ teaspoon garlic powder
- ½ teaspoon onion powder
- pepper, to taste
- bacon bits

Mix all ingredients, except bacon bits, together until smooth. Shape into a ball and chill for 1 hour, then roll in bacon bits. Wrap in plastic wrap and chill until ready to serve. *Serves 15-20*

Rebecca Hancox • Plano  
Chariton Valley Electric Cooperative, Inc.

# HOLIDAY LIGHTS: CANDLELIGHT TO CO-OP POWER

How Christmas lights and rural electrification brought warmth, color and connection to Iowa homes

BY SAFE ELECTRICITY AND ANN FOSTER THELEN

Long before electricity, people brightened the dark winter months with firelight, from the burning of the Yule log to candles placed around the home. The first recorded candlelit Christmas trees appeared in Germany in 1660 and eventually spread across Europe, reaching the U.S. later in the century.

While the glow of the candles was festive, it also posed a serious fire hazard, so the light could only be enjoyed for a short time.

## A revolutionary spark

While Thomas Edison invented the incandescent light bulb in 1879, it was his colleague Edward H. Johnson who created the first electric Christmas tree lights in 1882. He hand-wired 80 colored bulbs around a revolving tree in his parlor, all powered by a generator.

Johnson's lights were ahead of their time, as electricity was not yet routinely available and electric lights were considered expensive. President Grover Cleveland and his wife First Lady Frances Cleveland helped boost acceptance in the 1890s when the White House Christmas tree was illuminated with colored bulbs to delight their young daughters.

The tradition of outdoor light displays, now associated with driving around to view beautifully lit homes and elaborate light shows, began in North America. This expansion was made possible by the development of safe outdoor Christmas light bulbs and light strings in the 1920s.

## Lighting up Iowa's countryside

In Iowa, rural homes didn't see the glow of electric Christmas lights until the 1930s and 1940s, when

rural electric cooperatives began bringing power to farms and small towns. Before then, kerosene lamps and candles offered only a modest holiday shimmer. When electricity finally reached the countryside, families could string colorful bulbs for the first time, a symbol not just of celebration but of progress.

The arrival of electric lights brought a new kind of warmth to rural winters, brightening long nights and connecting communities across the state.

### LEDs, smart displays and sustainability

Every holiday season, millions of light sets brighten homes across the country. From twinkling displays set to music to TV favorites like ABC's "The Great Christmas Light Fight," modern holiday lighting turns neighborhoods into dazzling shows filled with festive moments when we flip the switch and watch them glow.

Christmas lights have come a long way. Today's LED lights shine brighter than ever, creating beautiful displays while using less energy and lasting longer. LED light strings use about 80-90% less electricity than traditional incandescent bulbs and can last up to 25 times longer. They also stay cooler to the touch, reducing fire risks, and their shatter-resistant lenses make them safer and easier to handle.

Many communities now offer recycling programs for old light strings, and energy-efficient options make it easy to decorate responsibly. For electric cooperatives, encouraging LED lighting is part of an ongoing effort to help members save energy and money while keeping the season bright.

### Behind the bulbs: The technology of light

From the first incandescent filaments to today's smart LEDs controlled by phone apps, holiday lighting has mirrored the evolution of electric power itself. The same current that once revolutionized rural life now drives innovation in energy efficiency and smart home technology.

Many electric cooperatives are helping members explore these new frontiers, from real-time usage tools and rebates for efficient lighting to systems that make homes brighter and more connected. Each advance continues the story of illumination that began more than a century

ago, when light first connected homes to the wider world.

### A brighter tomorrow

As we look to the future, Christmas lights remain a shining reminder of how far we've come, from candlelight to clean, efficient energy. Each twinkle tells a story of innovation, cooperation and community spirit. Across Iowa and beyond, those bright strands remind us that even in the darkest winter nights, we have the power to bring warmth and wonder to the world around us.

*Article by Safe Electricity with supplemental content provided by Ann Foster Thelen, editor of Iowa Electric Cooperative Living.*

## NONDISCRIMINATION STATEMENT

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, USDA, its Mission Areas, agencies, staff, offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in language other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotope, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720-2600 (voice and TTY); or the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a complainant should complete a Form, AD-3027, USDA Program Discrimination Complaint Form, which can be obtained online at <https://www.usda.gov/forms/electronic-forms>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of the alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

- (1) Mail: U.S. Department of Agriculture  
Office of the Assistant Secretary  
for Civil Rights 1400  
Independence Avenue, SW  
Washington, D.C. 20250-9410; or
- (2) Fax: (833) 256-1665 or  
(202) 690-7442; or

## HOLIDAY CLOSURES

From our Grundy County REC family to yours, we wish you a safe and warm holiday season with friends and family.

Our office will be closed the following days to give our employees time to celebrate the holidays with loved ones:

**Thursday, Dec. 25**

**Friday, Dec. 26**

**Thursday, Jan. 1**

As always, our phones are answered 24/7, year-round.  
Call 319-824-5251 to report an outage or power-related emergency.

We are looking forward to another year of serving you!

## CO-OP MONTH WINNERS

Thank you to everyone who participated in this year's National Co-op Month activities! Congratulations to the following participating members for having their names drawn to receive prizes!

### CO-OP SWAG WINNERS:

Nick Kalinay      David Hook  
Paula Seward      Rick Bauler  
Valerie Schable

### \$50 BILL CREDIT WINNERS:

Chris Thome  
Janelle Koch

**Coming soon!**

Patronage dividends will be reflected on your December bill.

## WHAT OUR MEMBERS SAY

"I love the scholarship opportunities given to our students and the trip to Washington, D.C."

"Thank you to the REC crew for your good service to keep the lights on to serve us."

"I was trimming trees and had some close to the power line. I called and they sent a person out to trim by the line. I really appreciated that."

"Huge shout out to Grundy County REC! Less than one hour after reporting an outage, power was restored! Thank you, you're the best!"

We sure do love receiving such kind words from our members!

# CALLING ALL MEMBER STUDENTS

At Grundy County REC, we believe in empowering our next generation of leaders and providing valuable opportunities for our member-students to learn, grow and prepare for a bright future. Applications are now being accepted for the 2026 Youth Tour trip and 2026 Cooperative Scholarship Program.

Each year, the cooperative sponsors one high school sophomore, junior or senior to attend the Youth Tour trip in our nation's capital. This is an all-expenses-paid trip that students will never forget! Participants learn about electric cooperatives, American history and U.S. government. They also have the opportunity to visit with their representatives in the House and the Senate and tour popular destinations around D.C.

## 2026 YOUTH TOUR

June 14-20 • Washington, D.C.

**EXCITING NEWS!**

The Youth Tour application is now an online, fillable form that can be submitted right from our website. No more downloading a PDF to print and mail.

For more information, visit [grundycountyrecia.com/youth-tour](http://grundycountyrecia.com/youth-tour).

# SCHOLARSHIP PROGRAM

## Empowering our students

Each year, we are honored to support the academic dreams of local, member students who demonstrate academic excellence and a strong commitment to their communities with our scholarship program. Through this program, we are proud to help these students take the next step in their academic journeys!

To learn more about our scholarships program, visit [grundycountyrecia.com/scholarships](http://grundycountyrecia.com/scholarships).

# 2026 MOMENTUM IS BUILDING CONFERENCE DETAILS

Iowa builders and contractors are invited to discover the latest advancements in energy efficiency technologies at the **2026 Momentum is Building Conference**, set for Feb. 19-20 at the Sheraton in West Des Moines.

The annual conference offers opportunities for contractors to earn continuing education units (CEUs) in Iowa's plumbing/mechanical, HVAC and electrical codes. Attendees will also have the chance to network with industry peers, learn from leading experts in energy efficiency and the building trades, and gain insights into current energy efficiency regulations and incentives.

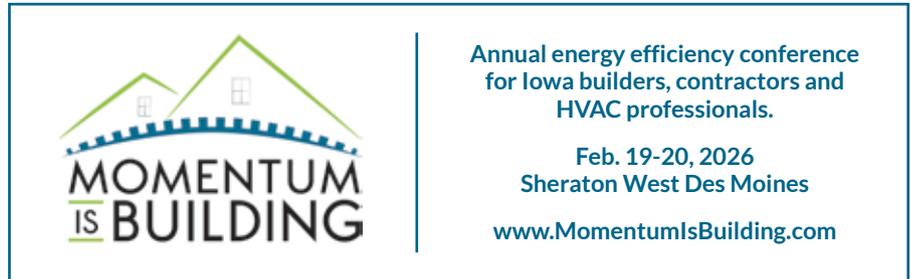

Sponsored by the Iowa Cooperatives for Energy Efficiency, the annual Momentum is Building Conference connects Iowa's construction industry with the services and resources provided by local electric cooperatives, which serve nearly 650,000 Iowans across all 99 counties.

"Electric cooperatives have long supported energy efficiency, and one of our key goals is to help member-consumers use energy wisely," said Angela Catton, vice president of communications and development at Northwest Iowa Power Cooperative. "We invest in this conference to build relationships between cooperatives and the contractors who serve our members."

## Lineup of speakers, educators

The conference kicks off with Justin Wilson from Construction Instruction as the keynote.

"Wilson, who spoke in 2013, will discuss current policies, technologies, and consumer trends affecting home building and remodeling," shared Ryan Cornelius, vice president of corporate relations at Corn Belt Power Cooperative.

The conference also welcomes back Bill McAnnally, who can be heard monthly on Iowa Public Radio's "Talk of Iowa - Home Improvement Day." CEU providers, Dave Sullivan (electrical), Terry Moorman and Jeff Reichart (PMSB), who have been long-time partners and presenters at the conference, will return to offer their specialized training to attendees.

The conference will close with Kenyon Murray on Friday, Feb. 20. Kenyon is the CEO of Murray Legacy Management and the business manager to his sons, Kris and Keegan, who play in the NBA. He is a host of "The Leave Your Legacy Show" and became a Certified Professional Life Coach. In his session, attendees will be introduced to a simple and digestible way to embrace personal growth. The goal is to share tools for creating a

systematic personal routine that can impact their lives at multiple levels.

## A long-standing resource

For almost 35 years, the Momentum is Building Conference has provided a platform for electric cooperatives and contractors to collaborate in delivering safe, efficient and cost-effective home comfort solutions to Iowans.

Don't miss this chance to stay ahead of the curve in energy efficiency and enhance your professional skills. For more information or to register for the 2026 Momentum is Building Conference, visit [www.MomentumIsBuilding.com](http://www.MomentumIsBuilding.com).

Discounted Early Bird registration runs until Monday, Jan. 19.

# GIVING GIFTS FROM THE HEART

BY DARCY DOUGHERTY MAULSBY

When you were a kid, what was your favorite toy for Christmas? Farm toys top the list for Nolan Toomsen.

While Nolan lives on a farm near Geneva in Franklin County, his mom, Erin (Frank) Toomsen, is from Lake City, my hometown. When I visited with Nolan this fall during his Grandma Rita's birthday party, I asked if he wants to be a farmer when he grows up. "I'm a farmer right now," stated Nolan, who celebrated his 5th birthday in early January 2025 with a Pioneer Seed-themed party.

Then I asked Erin about Nolan's accident on Jan. 28, 2025. Erin was at work (she's a kindergarten prep teacher in Hampton), and the Toomsen's older kids were at school. Just a typical Tuesday.

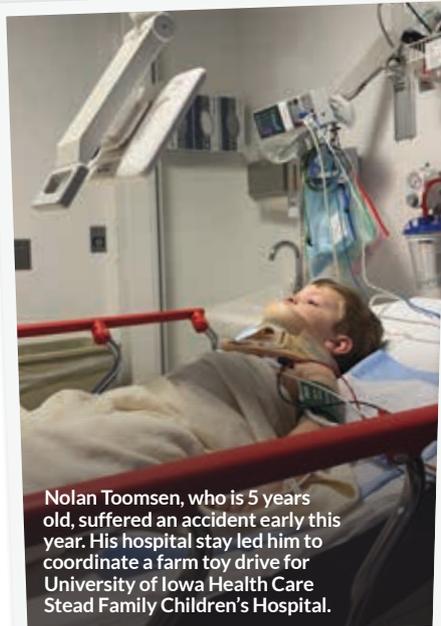

Nolan wasn't feeling well that morning, however, and needed to go home. His dad Tyler took Nolan and his little brother Brody, 2 (who was also home, since daycare wasn't open), along to do farm chores. Around this time, a fluke accident left Nolan unresponsive. He was rushed by ambulance to Franklin General Hospital in Hampton. Then Life Flight whisked him to the University of Iowa Health Care Stead Family Children's Hospital in Iowa City. The medical team ran a CT scan and an MRI on Nolan, who suffered strained neck muscles.

## Turning compassion into action

After a short stay, Nolan returned home wearing a cervical collar. "I really liked it when I finally got to take it off," Nolan told me. "I burned it."

Despite his quick recovery, Nolan couldn't quit thinking about something that troubled him about the Children's Hospital. They only had two toy tractors, several wagons and an odd assortment of farm animals, including a dolphin. (Don't get Nolan started about how silly this is.)

"Nolan told me he wanted to donate some of his farm toys to the Children's

Nolan Toomsen, who is 5 years old, suffered an accident early this year. His hospital stay led him to coordinate a farm toy drive for University of Iowa Health Care Stead Family Children's Hospital.

Hospital for other kids who have to go there," Erin said. He also wanted her to write a letter for him, which she posted on her Facebook page in mid-May.

The letter read: "Do you want to give me some money to buy more tractors for the Iowa City Hospital because the ones they had weren't very good. From Nolan."

Checks and electronic money transfers via Venmo started pouring in from friends, family and strangers. Nolan received more than \$3,000 from more than 200 different donors. Combined with significant discounts from the businesses he purchased from, Nolan was able to donate about \$5,000 worth of farm toys.

## The joy of giving

On delivery day (Aug. 15), the Toomsen family filled the back of their Ford Expedition with toys from John Deere, Case IH, Little Buster Toys and Big Country Toys. When I asked Nolan if it was hard for him to part with any of them, he admitted he really liked a CASE IH harvest equipment set. "But I'd paint it green if it were mine," he emphasized.

Nolan is pictured with some of the farm toys he donated to the hospital.

"We know that these carefully selected toys will help brighten the day of many farm-loving kids who are facing battles in the hospital," said Erin, who added Nolan has always had a kind heart. "We can't thank everyone enough for helping Nolan give back."

The toys have been well received by pediatric patients of all ages, reports Sheri Austin, supervisor, concierge services & Rossi Lodging Program, for University of Iowa Health Care.

"Thank you, Nolan, and your family and community, for generously donating high-quality farm toys to the Stead Family Children's Hospital. Your thoughtful gift has brought joy to children from across Iowa," she said

As we celebrate the priceless gift of a child during this Christmas season, never forget that the greatest gifts are never wrapped in paper, but in love.
